# Methodologies:

## Sectorsoft Delivery Methodology:

The Software Delivery Methods consistently targets solution deliveries matched with customers' business objectives

It focuses on delivering business capability quickly and frequently using a highly disciplined, collaborative, and flexible approach

It combines the best practices from various Agile solution methodologies and CMMI

## Software Development Lifecycle

The Software Lifecycle defined by Harank is highly dependent on feedback and adaptation to adjust plans, implementations, deliverables and support as changes occur in the customers' vision and business needs. The major phases of the lifecycle include:

- ENVISION & PREPARE
- IMPLEMENT & EVOLVE
- DEPLOY & SUPPORT

Each of these elements of the Development lifecycle can influence others through "inspect and adapt" cycles. For instance, discoveries made during a deployment can alter the roadmap originally produced in the initial Envision & Prepare cycle which is immediately reflected in the next iteration and release of the following Implement

Our Development Methodology is grounded in a set of Core Values and supporting Principles that guide individuals in making decisions, prioritizing work, and interacting with stakeholders. Our Core Values are the foundation of how we conduct our professional

**CUSTOMER INTIMACY**, which involves frequent communication, collaboration and joint problem solving to better understand and to solve the problems.

**RESPONSIVE TO CHANGE** by adjusting our backlog of work to respond for any changes in business environment - **INCREMENTAL DELIVERY** to provide frequent and predictable increments of functionality and meet the business objectives at the time of each delivery.

**FOCUS ON QUALITY** means that quality is built into our solutions from the beginning ensuring that we are developing the right solution in the right way.

**ADAPTIVE** describes our desire to continuously inspect and adapt our practices to improve and satisfy our customers

Our Principles help guide us in selecting appropriate practices in support of our Core Values. Where core values define "Why", principles determine "How" We Work. An example includes

## Principles of

- Enable Open Communication,
- Focus on Delivering Business Value
- Create Sustainable Rhythm.

## support our values of

- Customer Intimacy, Responsive to Change, and
- The values and supporting principles are the foundation of our core delivery practices and represent our mindset.

SECTORSOFT's ability to serve customers and track customer information across multiple channels enable us to consistently provide positive, intelligent service on behalf of our clients.

--> Back office Processing

SECTORSOFT BPO Solutions offers comprehensive, back-office services: order and payment processing, E-Commerce, catalog, continuity services and rebate processing activities.

#### **Website Development/Corporate Website:**

For thousands of prospective buyers that see customer/client Company on the Internet delivers the "first impression" of your company. Hire SECTORSOFT INDIA (P) Ltd., and you can have a great looking web site that will put you a cut above your competitors. We design it with your major goals in mind like... generating leads, reducing customer service costs, attracting new employees. We want the web site designed by SECTORSOFT INDIA (P) Ltd., to be an integral part of your company.

#### **Database Driven Website:**

A database-driven Web site combines a basic, static HTML "container" wrapped around records from an external database, which are loaded into a pre-set space within the page. By combining the power of today's databases with the Web's ability to distribute information, database-powered Web sites are a key driver for today's e-commerce revolution. Present companies are looking for an opportunity to transform their Web sites from collections of static, text-based information into dynamic business tools. Database driven pages offer some advanced capabilities, such as publishing data from corporate databases into Web pages and customizing a visitor's view of a site around their individual needs and preferences. A new generation of Web-based buying and selling tools is emerging, that will enable any industry to develop valuable new forms of one on - one interaction with customers and suppliers...

## Our Projects:

### BLUE TONE PROCESS:

Bluetone is a facility-based licensed carrier headquartered in Rochester NY. Our history with developing and offering both voice and data products to other carriers and businesses has contributed greatly to our success over the past 7 years. Bluetone's mission is to be considered the industry leader in both customer support and flexible telecommunication solutions. Our culture was built around this mission and continues to guide us in how we operate the company. At Bluetone, figuring out how we are going to meet and exceed our customers' expectations is what drives our behavior. We believe these efforts are what establish long term relationships with our customers and allow these relationships to evolve into partnerships. Our mission and culture combined with our buying power and automation has given us the ability to build products that possess the highest levels of quality, cost effectiveness, and customization. From POT's and Long Distance to MPLS and Hosted PBX solutions, Bluetone has implemented a support system and level of automation our customers demand.

### HEALTH CARE MANAGEMENT:

The Hospital Management System project helps to control the room allocation, medicine, prescriptions, payments, etc. Also, the administrator can register new employees and give the required rights to them. There are numerous challenges confronting the healthcare systems of Caribbean countries. The public healthcare systems in the region currently face a crisis due to factors such as shortages of medical staff, lack of proper facilities, and insufficient FUNDING. Therefore, new approaches to managing healthcare and promoting healthier lifestyle practices are needed to address this problem..

### HR PAY ROLL:

A Description of user of the user interface and documentation and training requirements. Pay roll Management is to Provide an option To Generate the salary automatically every month. This software also equipped with to enter the attendance of each employee in organization, it helps them to track each employee attendance, based on this we can generate the salary. The software built to generate individual pay slip and summary of the payroll. It also has option to generate the report for provident fund and ESI. So they can take the print for provident fund and ESI to submit to the department.
